Part I Reading Comprehension (阅读理解, 40 分, 20×2)

Directions: There are 4 passages in this part. Each passage is followed by some questions or incomplete sentences. For each of them there are 4 choices marked A, B, C and D. You should decide on the best choice and mark the corresponding letter on the Answer Sheet. (2×20)

Passage One

Do you use soap every day? Do you know when people started using soap and how it is made? The word "soap" comes from the Celtic word "saipo", which means "fat", the material that soap is made from. The oldest soap dates back to 3,000 BC, when people in Mesopotamia used it for cleaning the wool. Over the following centuries, soap continued to be used to clean everything but the human body.

In the second century, a Greek doctor named Galen wrote about the practice of using soap to clean the body. However, bathing with soap was still not common. It wasn't until the seventeenth century that soap was used for bathing in Europe, but only the rich people could afford it. In the nineteenth century, the soap became available to most people. As a result, cleanliness standards improved in many places.

One reason that soap has been so popular throughout history is that it isn't hard to make. To make it, take some alkali (碱) and mix it with fat or oil. Once everything is mixed, leave the soap in a mold (模具) until it becomes hard. After 24 hours, it's ready to cut into pieces. But please remember, you must be patient. Because the soap still needs around two to three weeks to become hard enough before you can use it.

Being easy to make, soap has helped humans stay clean all the way to the modern age. You could even say it's one of the most important inventions in human history.

Passage Two

My mom's a big fan of posting pictures on her WeChat Moments: from the bright blue sky and lush green mountains to tranquil clear waters —these were what our family enjoyed when camping in a park during this summer holiday. In fact, it is not difficult to find such places in our cities these days. Because, in the past decade, thousands of parks have been built in China, some even transformed from garbage dumps.

My mom cherishes natural scenery and green environment because she comes from a small, poor village where people's life once depended on mining. When she was my age, the air there was so polluted that even the green bamboo leaves on the mountains were covered by black coal dust. In the past decade, however, things have changed.

With the mines closed, the environment has improved tremendously and the local people have found new ways

to live. Many of our relatives there are now engaged in business, such as selling tea and running a hotel, and one third of the local population lives on tourism-related services. Their experiences truly prove that "green mountains are gold mountains".

The past decade has witnessed a momentous shift in China's development strategies, and we've undertaken the path toward green development and a more beautiful China. For instance, eight years ago, Beijing won its bid to host the 2022 Winter Olympics and promised a greener Olympic Games. Last year, we enjoyed the most eco-friendly and sustainable Olympic Games in human history. These Chinese contributions to world environmental efforts represent China's wisdom and set an example for the globe.

Passage Three

It's a long-awaited evening. The League for People with Disabilities is transformed into a shining nightclub for disabled adults, Lucky Club. The classrooms become dancing halls. DJs play strong club music. Hundreds of the disabled come to dance and make friends in Lucky Club. Some want to find love. Lucky Club attracts all of them because it has the sense of safety. It has the feeling that no one is judging them. They can be like anyone else out for the night.

The League for People with Disabilities was founded in June, 2016. The club opened exactly three years later and grew quickly, packing in many people from all over the state. The ultimate goal is "full inclusion", which means people with disabilities should be integrated into all aspects of life.

Mike Hornby, 27, says, "It is one of my favorite places in the whole wide world." Adults with disabilities, like Mike, yearn for more opportunities to socialize. Lucky Club stands out because it is held once a month and draws many people. Local, state and national supporters are not aware of another event like it in the country.

Sally Stem, 63, says, "Whatever you come looking for, you can find it here." She uses a wheelchair after being paralyzed in 1994. She was hit by a car. "We see a lot of relationships blossom. Some fail. Love is always in the air here at Lucky Club. Everybody feels free here."

Organizers said most club-goers have intellectual or developmental disabilities. Roughly 1 in 6 is unable to speak. About 1 in 4 uses a wheelchair.

Passage Four

Science fiction has suddenly become popular since the 21st century. Before the year 2000, Chinese science fiction was known to only a small number of people in China. Few works were translated, and the Western world had little taste for it. But the once sub-genre has become internationally recognized, mainly because of Ken Liu, a writer, translator and computer scientist. Ken Liu has done more work than anyone else to translate Chinese science fiction. However, his and the genre's defining moment was Liu Cixin's novel called *The Three-Body Problem*, a mind-boggling, hard science fiction. When Ken Liu translated *The Three-Body Problem*, it became the first contemporary Chinese science fiction novel in English. Published in 2014, it proved to be a big success. Of course, writing in Chinese is different from writing in English. The meaning and references used in Chinese science fiction are unique to the genre. In the stories Ken Liu translated, multiple footnotes are used to describe details Western readers may not understand, and they explain why a word or sentence is written in a certain way. The use of traditional and cultural objects and places in Chinese science fiction makes the genre a cultural and historical analysis of China. This also gives translated works a foreign and distinct feel. After reading *The Three-Body Problem*, for example, Western readers discover some differences and similarities between Western and Asian cultures.

After meeting someone for the first time, do you see yourself as attractive? Or do you find yourself doing everything wrong? If you have the former description, you are in the minority. Studies show lots of people take a rather low opinion of their conversational abilities, as well as the social impressions they have.

In most situations, we are often much more pleasant company than we think, yet we forget all the signals of friendliness towards us. We are so busy worrying about the impression we've given that we miss all the positive signals. We worry about trifling things that we might have said wrong. We don't notice someone's encouraging smile or the warmth in their eyes.

A little self-awareness can be healthy. But many of us are far too pessimistic. This may prevent us from connecting with people who may really appreciate us.

61. Since 2004, (A) a number of people (B) who live there (C) has grown (D) from 200 to 8,000.

解析 A 改为 the

解析 the number of + 复数名词作主语，谓语用单数 has；a number of 表“许多”，谓语应用复数，此处与 has 不一致，故 a 改为 the。

62. It (A) was over thirty years (B) since I (C) graduated from (D) college.

解析 A 改为 is（或 has been）

解析 “It is/has been + 时间段 + since...” 为固定句型，since 从句用过去时，主句用现在时或现在完成时。

63. We (A) are amazed that she (B) dances so beautifully as if she (D) was a butterfly.

解析 D 改为 what

解析 of 后接 what 引导的宾语从句，what 在从句中作 like 的宾语。

△ **答案存疑** 搜狐扫描版将错误项标注为“D 改成 what”，库课文字版直接写“that 改为 what”。介词 of 后需宾语从句引导词，从句 life was like 缺表语，应用 what (= the thing that)；that 引导名词性从句时不充当成分。故被划线的应是 that 一词，按扫描版字母标为 D。

67. (A) Nothing would prevent him (B) for (C) speaking out against (D) injustice.

解析 B 改为 from

解析 prevent sb (from) doing sth 阻止某人做某事，用介词 from。

69. The professor (A) told us (B) that we should do it for (C) us own (D) good.

解析 C 改为 our

71. 作文题：The Power of Kindness (至少 120 词)。

参考范文 (非官方，仅供参考) (以下范文整理自库课/天任等机构考后公布的范文，非官方标准答案，仅供参考。) **The Power of Kindness** Since ancient times, there has been the debate between kindness and evil. However, people have always praised kindness. In fact, the power of kindness is seen everywhere. I remember that one day I was going to take the subway to attend an important interview. Unluckily, I forgot to take my wallet and my mobile phone, without which I could not buy a subway ticket. I was very worried and then a lady offered me some money for the ticket. I was so grateful for her lending me a hand, and I made up my mind to pass on such kindness to others. As far as I am concerned, kindness is a powerful force that can change the world. Firstly, kindness can be expressed in many ways, such as a genuine smile, a kind word or a thoughtful gesture. It can make someone's day brighter and bring hope to those who are struggling. In addition, the power of kindness also has a long-running positive effect. When we are kind to someone, it inspires him or her to be kind to others as well. This creates a chain reaction of kindness that can spread throughout our communities and beyond.

解析 提纲式作文：引入（自古推崇善良）→ 举例（地铁站陌生女士帮忙买票）→ 看法（善良可传递、形成链式反应），120 词以上。
