Part I Reading Comprehension $20 \times 2 = 40$ 分; Part II Cloze $20 \times 1 = 20$ 分; Part III True or False $5 \times 2 = 10$ 分; Part IV Translation 40 分 (Section A 英译汉选择 5×2 、Section B 选词填空 5×3 、Section C 汉译英 5×3); Part V Error Correction $10 \times 2 = 20$ 分; Part VI Writing 20 分。合计 150 分。

姓名: _____ 准考证号: _____ 座位号: _____

Part I Reading Comprehension (阅读理解, 40 分, 20×2)

Directions: There are 4 passages in this part. Each passage is followed by some questions or incomplete sentences. For each of them there are 4 choices marked A, B, C and D. You should decide on the best choice and mark the corresponding letter on the Answer Sheet. (2×20)

Passage One

Do you use soap every day? Do you know when people started using soap and how it is made? The word "soap" comes from the Celtic word "saipo", which means "fat", the material that soap is made from. The oldest soap dates back to 3,000 BC, when people in Mesopotamia used it for cleaning the wool. Over the following centuries, soap continued to be used to clean everything but the human body.

In the second century, a Greek doctor named Galen wrote about the practice of using soap to clean the body. However, bathing with soap was still not common. It wasn't until the seventeenth century that soap was used for bathing in Europe, but only the rich people could afford it. In the nineteenth century, the soap became available to most people. As a result, cleanliness standards improved in many places.

One reason that soap has been so popular throughout history is that it isn't hard to make. To make it, take some alkali (碱) and mix it with fat or oil. Once everything is mixed, leave the soap in a mold (模具) until it becomes hard. After 24 hours, it's ready to cut into pieces. But please remember, you must be patient. Because the soap still needs around two to three weeks to become hard enough before you can use it.

Being easy to make, soap has helped humans stay clean all the way to the modern age. You could even say it's one of the most important inventions in human history.

Passage Two

My mom's a big fan of posting pictures on her WeChat Moments: from the bright blue sky and lush green mountains to tranquil clear waters —these were what our family enjoyed when camping in a park during this summer holiday. In fact, it is not difficult to find such places in our cities these days. Because, in the past decade, thousands of parks have been built in China, some even transformed from garbage dumps.

My mom cherishes natural scenery and green environment because she comes from a small, poor village where people's life once depended on mining. When she was my age, the air there was so polluted that even the green bamboo leaves on the mountains were covered by black coal dust. In the past decade, however, things have changed.

With the mines closed, the environment has improved tremendously and the local people have found new ways

to live. Many of our relatives there are now engaged in business, such as selling tea and running a hotel, and one third of the local population lives on tourism-related services. Their experiences truly prove that "green mountains are gold mountains".

The past decade has witnessed a momentous shift in China's development strategies, and we've undertaken the path toward green development and a more beautiful China. For instance, eight years ago, Beijing won its bid to host the 2022 Winter Olympics and promised a greener Olympic Games. Last year, we enjoyed the most eco-friendly and sustainable Olympic Games in human history. These Chinese contributions to world environmental efforts represent China's wisdom and set an example for the globe.

Passage Three

It's a long-awaited evening. The League for People with Disabilities is transformed into a shining nightclub for disabled adults, Lucky Club. The classrooms become dancing halls. DJs play strong club music. Hundreds of the disabled come to dance and make friends in Lucky Club. Some want to find love. Lucky Club attracts all of them because it has the sense of safety. It has the feeling that no one is judging them. They can be like anyone else out for the night.

The League for People with Disabilities was founded in June, 2016. The club opened exactly three years later and grew quickly, packing in many people from all over the state. The ultimate goal is "full inclusion", which means people with disabilities should be integrated into all aspects of life.

Mike Hornby, 27, says, "It is one of my favorite places in the whole wide world." Adults with disabilities, like Mike, yearn for more opportunities to socialize. Lucky Club stands out because it is held once a month and draws many people. Local, state and national supporters are not aware of another event like it in the country.

Sally Stem, 63, says, "Whatever you come looking for, you can find it here." She uses a wheelchair after being paralyzed in 1994. She was hit by a car. "We see a lot of relationships blossom. Some fail. Love is always in the air here at Lucky Club. Everybody feels free here."

Organizers said most club-goers have intellectual or developmental disabilities. Roughly 1 in 6 is unable to speak. About 1 in 4 uses a wheelchair.

Passage Four

Science fiction has suddenly become popular since the 21st century. Before the year 2000, Chinese science fiction was known to only a small number of people in China. Few works were translated, and the Western world had little taste for it. But the once sub-genre has become internationally recognized, mainly because of Ken Liu, a writer, translator and computer scientist. Ken Liu has done more work than anyone else to translate Chinese science fiction. However, his and the genre's defining moment was Liu Cixin's novel called *The Three-Body Problem*, a mind-boggling, hard science fiction. When Ken Liu translated *The Three-Body Problem*, it became the first contemporary Chinese science fiction novel in English. Published in 2014, it proved to be a big success. Of course, writing in Chinese is different from writing in English. The meaning and references used in Chinese science fiction are unique to the genre. In the stories Ken Liu translated, multiple footnotes are used to describe details Western readers may not understand, and they explain why a word or sentence is written in a certain way. The use of traditional and cultural objects and places in Chinese science fiction makes the genre a cultural and historical analysis of China. This also gives translated works a foreign and distinct feel. After reading *The Three-Body Problem*, for example, Western readers discover some differences and similarities between Western and Asian cultures.

1. What was the original purpose of soap in Mesopotamia? (())
A. To wash faces. B. To wash dishes.
C. To clean the wool. D. To clean the wood.
2. When did soap become available to most people? (())

- A. studied B. study
C. had studied D. studies
40. ...as () as I complete my study in China. (())
- A. fast B. many
C. much D. soon

Part III True or False (阅读判断, 10 分, 5×2)

Directions: Read the passage and then decide whether the following statements are True or False. You should mark A or B on the Answer Sheet, A for True and B for False. (2×5)

After meeting someone for the first time, do you see yourself as attractive? Or do you find yourself doing everything wrong? If you have the former description, you are in the minority. Studies show lots of people take a rather low opinion of their conversational abilities, as well as the social impressions they have.

In most situations, we are often much more pleasant company than we think, yet we forget all the signals of friendliness towards us. We are so busy worrying about the impression we've given that we miss all the positive signals. We worry about trifling things that we might have said wrong. We don't notice someone's encouraging smile or the warmth in their eyes.

A little self-awareness can be healthy. But many of us are far too pessimistic. This may prevent us from connecting with people who may really appreciate us.

41. After meeting someone for the first time, few people think they are attractive. (())
- A. True
B. False
42. In most occasions, we can find the signals of friendliness. (())
- A. True
B. False
43. We are so anxious about the first impression we have given that we pay little attention to positive signals. (())
- A. True
B. False
44. Much self-awareness during the first conversation with others is necessary. (())
- A. True
B. False

45. Pessimistic judgement about our first impression helps to form relationship. (())

A. True

B. False

Part IV Translation (翻译, 40 分)

Section A 英译汉选择 (10 分, 5×2)

Directions: There are 5 sentences in this part. For each of them there are 4 choices marked A, B, C and D. You should decide on the best choice and mark the corresponding letter on the Answer Sheet. (2×5)

Section B 选词填空 (15 分, 5×3)

Directions: Choose the appropriate translation to fill in each blank to make the following paragraph meaningful and write down the corresponding letter on the Answer Sheet. (3×5)

备选项 (选词框, 每项限用一次): A. cold B. still C. represent D. representative E. stile F. soil layer G. soil appearance H. weather I. cool J. climate

In Northwest China, the __51__ of civil residence is cave or Yaodong. The reason why people __52__ live in such caves is that the depth of the __53__ of Loess Plateau is more than 100 meters, with poor water permeability but strong uprightness. The people make full use of the local __54__ and soil conditions to develop this kind of folk house. There are many advantages to live in such caves, for example, saving energy, environment friendly, warm in winter and __55__ in summer.

Section C 汉译英 (15 分, 5×3)

Directions: Translate the following sentences into English and write your answers on the Answer Sheet. (3×5)

46. I can still picture my primary school I studied in. (())

A. 我平静地画出我就读的小学。

B. 我仍然有我就读小学的照片。

C. 我还能回忆起我就读的小学。

D. 我能平静地回忆起我的小学。
