Part I Reading Comprehension (阅读理解, 40 分, 20×2)

Passage One

With China's rapid development in artificial intelligence (AI) technologies, more companies have noted the huge business potential in AI companionship sectors, as simulated AI pets with adorable appearances are gaining increasing popularity among Chinese consumers.

Zhang Yi, CEO of the Media Research Institute, said that consumers' demand for emotional support and the capability of current AI technologies offered this type of products greater business potential.

A 20-year-old student named Wang Li, who is also an AI technology fan, said that she bought "Boo Boo", a simulated AI robotic pet developed by Hangzhou-based Genmoor Technology.

"I first learned about the product during a major assignment investigation and remembered it," said Wang Li.

"I decided to buy it out of curiosity, but especially because of its adorable fluffy appearance and the color of its fur, which is just like my dog's," Wang Li added.

Boo Boo is currently available on Chinese e-commerce platform Taobao, priced at 1399 yuan. Over 300 sets have been sold, with a 100 percent positive feedback rate in the last three months, the product's page showed. One employee said that it had been sold out weeks ago and has now been restocked.

Wang Li stated that the advantage of having an AI pet is that it doesn't require extra spending on food or time for walks every day, while noting that it still lacks interaction flexibility and real companionship when compared with real dogs or cats.

Zhang Yi predicted more possibilities in applying AI technologies in emotional support and companionship robots, with target users covering all age groups, and whose functions include the ability to detect users' potential physical and mental health issues.

Directions: There are 4 passages in this part. Each passage is followed by some questions or incomplete sentences. For each of them there are 4 choices marked A, B, C and D. You should decide on the best choice and mark the corresponding letter on the Answer Sheet.

Passage Two

Guochao, literally meaning "national tide", refers to modern products packed with traditional Chinese cultural elements. In recent years, it has experienced a rise because of a growing interest among younger generations in their cultural heritage and a desire to integrate it into their daily lives. Many platforms now show traditional crafts, fashion and art, making them more accessible and appealing.

For example, with the arrival of the year of the snake, the image of the snake is integrated into various products such as hongbao, the red envelope that older generations fill with money and give to young people as a symbol of good fortune.

These hongbao are printed with beautiful designs featuring the snake, making them not just practical gifts but also precious souvenirs. The rise of the Guochao craze reflects the attraction of traditional Chinese culture to modern concepts. Guochao products combine traditional cultural elements with modern design.

Shanxi's cultural tourism has rapidly gained popularity because of the global hit online game Black Myth: Wukong. As many scenes in the game are created based on cultural and historical sites in Shanxi, the province is witnessing a remarkable surge in tourists, who are either the fans of the game or fans interested in the ancient architecture and sculptures and the stories behind them. The Guochao craze provides Shanxi with vast opportunities for innovation. The local government integrates Guochao elements into scenic area development and tourism souvenir creation. A line of refrigerator magnets shaped like the architecture in the game have been developed to increase the cultural value of tourism.

Passage Three

As China's visa-free travel policy continues to expand and facilitate easier exchanges between people, the attraction of "China Travel" becomes stronger.

Francisco Lopez, a tourist from Spain, shared his experiences with the Global Times on Sunday, highlighting the ease of his trip to China made possible by the country's visa-free policy and other supporting measures. During this trip, he visited Beijing, Xi'an, Guilin, and Shanghai. Among these destinations, Guilin stood out as his favorite due to its amazing natural beauty. "We rented bikes and explored the countryside, which was enjoyable. This trip helped me understand Chinese culture and history better," he said. During the trip, Lopez also experienced the convenience of China's e-payment system. "We didn't have cash and didn't exchange any money. We used Alipay everywhere, and it worked perfectly," he added.

To meet the needs of foreign tourists, various regions and tourist destinations in China are enhancing the tourism experience. A worker from the Wulingyuan scenic area in Zhangjiajie of central China's Hunan Province told the media that the visa-free policy has significantly boosted the tourism market, with a notable increase in the number of foreign visitors. "There is a shift in tourists, with more coming from southeast Asia and Europe thanks to the implementations of visa-free policies," another employee said.

In the first three quarters of this year, Zhangjiajie City received over 1.29 million inbound tourists, a year-on-year increase of 255.41 percent. The city achieved inbound tourism revenue of \$358.54 million, marking a year-on-year growth of 307.61 percent, according to official data.

Passage Four

In the face of an increasing climate change threat, the Belt and Road Initiative (BRI) actively pursues the spirit of green and low-carbon development. As the recent BRI white paper released by China's State Council points out, the BRI embraces the global trend of green and low-carbon development, emphasizes respect for and protection of nature, and respects the right of all parties to pursue sustainable and eco-friendly growth. By making use of Chinese technology, products and experience, China actively promotes BRI cooperation in green development. It has become evident that Chinese enterprises prioritize environmental conservation measures when conducting operations abroad. Meanwhile, there is an increasing use of Chinese energy products in Belt and Road countries, transported by rail and air, effectively utilizing renewable resources like wind and solar energy. Taking the co-

operation between China and Fiji as an example, in 2014, China and Fiji established South-South cooperation to address climate change. Chinese Ambassador Zhou Jian said that China and Fiji are both victims of climate change as well as partners in addressing it. It was pointed out that the cooperation between China and Fiji is a shining example of the green BRI. The Belt and Road Initiative Action Plan not only explains the important vision and significance of environmental protection and sustainability within BRI projects.

Currently, China has entered into environmental cooperation agreements with over 30 countries and international organizations. Furthermore, in cooperation with various nations, China launched the Initiative for Belt and Road Partnership on green development.

The Green Rural Revitalization Program in Zhejiang Province aimed to renovate 10,000 villages and transform 1,000 of them into models of "moderate prosperity", which refers to a status where "people are neither rich nor poor but free from want and hardship". In September 2018, the project won the United Nations Championship of the Earth Award, the UN's highest environmental honor. The project has a lot of experience to offer. Most importantly, the villages have identified their unique assets to promote local economic growth. Tangdi village in Shaoxing city has developed successfully from the orchid industry. Gejia in the city of Ningbo has become famous for its skills in batik. But the project's successes were not achieved overnight. From 2003 to 2010, the rural living environment was cleaned up, gradually contributing to a better overall ecological environment. In the second phase, from 2011 to 2020, the efforts to build "beautiful villages" brought about a transformation of local industries and culture sectors, further narrowing the urban-rural development gap. In 2021, the project entered its third phase, toward the guiding principle that China's growth should be people-centered and that in the pursuit of economic development, no one should be left behind. Part V Error Correction（短文/单句改错，20 分，10×2）

Directions: There are 10 sentences in this part. Each sentence has 4 underlined parts marked A, B, C and D. You are required to identify the incorrect part, and then write the corresponding letter and the correct answer on the Answer Sheet.

61. Don't stay up late (A), and (B) you will be (C) tired (D) the next day.

解析 B 改为 or

解析 祈使句 + or 表“否则”，意为“别熬夜，否则你第二天会累”；and 表顺承不合逻辑。

62. It is one (A) of the few (B) countries (C) which people drive on (D) the left.

解析 C 改为 where（或 in which）

解析 先行词 countries 表地点，定语从句中缺地点状语，用 where (= in which)。

△ **答案存疑** 库课文字版与天任扫描版均把错误项标注为“B 改为 where/in which”，但句中 B 为 the few（修饰 countries，无误），真正错误的是 C 处关系代词 which——先行词 countries 在定语从句中作地点状语，应用 where/in which。此处按语法逻辑订正为 C，两家“B”系转录误写。

63. (A) Whatever difficult the task is, we will (B) devote (C) ourselves to (D) finishing it.

解析 A 改为 However

解析 修饰形容词 difficult 应用 However (= No matter how)；Whatever 后接名词。

64. By (A) the end of next year, she (B) will be (C) in her present career (D) for ten years.

解析 B 改为 will have been

解析 “by + 将来时间”与完成性时间段 for ten years 连用，用将来完成时 will have been。

△ **答案存疑** 库课文字版写“B 改为 have been”，天任扫描版写“will have been”。由 By the end of next year（到明年年底为止）这一将来完成时标志，正确形式应为 will have been，库课疑漏 will。

65. The new drug is (A) of great (B) **significant** in helping (C) the doctor to cure (D) the disease.

解析 B 改为 significance

解析 "of great + 抽象名词" = very + 形容词, great 后应接名词 significance。

△ **答案存疑** 库课与天任均把答案标注为“A 改为 significance”，但句中 A 为 is（系动词，无误），真正错误的是 B 处 significant（形容词）——“of great + 名词”结构应用名词 significance。此处按语法订正为 B。

66. The installation of (A) **equipments** needs (B) so many experts (C) that we can not make it (D).

解析 A 改为 equipment

解析 equipment 为不可数名词，无复数，不能加 s。

67. (A) **Change** this situation, he (B) has been (C) working to build (D) a standardized industrial base.

68. He insists (A) on starting (B) to implement (C) the policy from June 1 (D) **if** we support him or not.

69. The committee had better adopt (A) the very proposal (B) that (C) **dam built** within two months (D).

解析 C 改为 (should) be built

解析 proposal 后的同位语从句用虚拟语气 (should) + 动词原形；dam 与 build 为被动，故 (should) be built。

70. Three years (A) **are** just a short time (B) in one's whole life, (C) but an important period (D) for students in senior middle school.

解析 A 改为 is

解析 表时间、距离、金钱的复数名词作整体概念时，谓语用单数 is。

With a growing number of libraries, museums, culture centers, art galleries and other public cultural facilities being built, young people now enjoy numerous public services for the improvement of cultural literacy. 71. 作文题：How to Improve Our Cultural Literacy（至少 120 词）。

参考范文（非官方，仅供参考）（以下范文由编者依题目材料与要求撰写，仅供参考，非官方标准答案，亦非任何机构公布的范文。）**How to Improve Our Cultural Literacy** Cultural literacy has become increasingly important in today's society. As more and more libraries, museums and culture centers are open to the public, it is high time that we took full advantage of these resources to raise our cultural literacy. To begin with, we should develop the habit of reading. Books open a window to different cultures and histories, so spending more time in libraries and bookstores is a practical choice. Besides, visiting museums and art galleries regularly is highly

recommended. Not only can we appreciate precious exhibits, but we can also gain a deeper understanding of our own traditional culture. Finally, we should take an active part in lectures, exhibitions and online cultural activities, which can enrich our experience in a relaxing way. In short, improving cultural literacy is a lifelong task. Only by reading widely and experiencing culture firsthand can we truly become well-rounded modern citizens.
